FOOD RECIPES CONTEST MANAGEMENT

ABOUT THE PROJECT

Food recipes contest management system enables the users to find healthy and delicious food recipes as well as the brilliant chefs. This project helps various people to participate in a food recipe contest and became winners. The major objective of this project is to give opportunities to housewives who have talent and interest in cooking. There is registration process for every user who are interested to participate in this contest and after registering with their username, address, phone number etc. they can go for log in. the log in process. The log in process requires the username and password that are given during registration.

When logged in the contestant can select a contest from the menu. The contest menu contains various types of food styles. The contestant can choose one of them and add their specialization area to that page. After the selection of contest, the administration team will contact the contestant and report the time and date for their recipe testing. After the manual testing of their food item the managing team will issue a mark for each contestant. After marking all the contestant's recipes the administrator will issue the toppers names and recipes according to marks.

The selected winners can upload their recipes into the website and other users or visitors of that page can see the recipes. And if the users are interested they can buy that food item online.

The administrators have the responsibility to manage contestant details, conduct contest, select winners, list the winners etc.

USER STORIES/REQUIREMENTS

Food recipe contest management system helps the users of the system to find good recipes of different types easily. Through the process of contest, the most brilliant contestants are selected as winners and the site contains only the recipes of those contestants. The system conducting a contest for its users and find the winners. There are prizes for the winners.

The user must register for the contest by using their name, address, contact information etc. then log in to the site. Then by using the username and password the user can log in to the system. A logged in user can see options such as contest, gallery, marks, winners etc. user can select an area of specialization from the contest menu and can apply for the contest.

According to the marks updated by administrator after checking the recipes , the winners of the contest are listed.

The winners can then logged in to the system and can update their recipes into the site.so that the ordinary user can view the recipes, photos etc.

If the ordinary user would like to buy a food item, they can order it through online.
